Problem Description

We want to help people manage their meals, calorie intake and give them access to recipes shared by other users.

Target Users

Users who like cooking their own meal, are serious about their calorie intake and have specific diets like vegans and pescatarians.

Project Goal

To give people a way to share and learn new recipes that allow them to change their cooking lifestyle with an experience that is custom to their needs.

Similar application

<https://www.recime.app>

We found an app called **ReciMe** that also allows people to share their recipes and organize them.
